Highlights of Business Expansion in Huntley Since the Approval of the Full Interchange

Improved mobility has made the Village of Huntley more attractive to commercial and industrial development. An important element in Huntley's economic development activities includes diversification of the Village's tax base. "The interchange was decades in the making and involved the tireless efforts of many people from our elected state representatives, Illinois Tollway and the Illinois Department of Transportation directors and staff, Kane and McHenry County Board officials and staff, and Village of Huntley elected officials and staff. I thank them, as well as the businesses of Huntley, for their commitment to this project. This commitment has set the stage for attracting more development, creating jobs and expanding the local tax base for decades to come" stated Charles Sass, Huntley's Village President.

Cargo Equipment, manufacturer of high quality load securement, tie-down equipment and supplies has completed construction of its 40,000SF manufacturing and warehouse facility in the Huntley Corporate Park. Like most new firms to the area, Cargo chose Huntley for its ease of access to I-90 and exceptional logistics available via rail, truck and air.

Life Spine, a high-tech R&D developer of specialized surgical tools and spinal implant devices, has relocated to its new 58,000SF facility in Huntley. Life Spine chose Huntley over sites in Texas due to its close proximity to O'Hare International Airport, Huntley's new interchange, and excellent workforce. Life Spine maintains over 60 patents with an additional 80 patents pending approval.

Weber Stephen LLC (the maker of Weber Grills) opened their 757,000 SF Global Distribution Center in 2015. The new \$26 million center will enable Weber to consolidate the distribution locations that are in Texas, Florida, Pennsylvania and Nevada. Mayor Sass credited the \$59 million tollway interchange project that was completed at Huntley's I- 90 in 2013 for enabling the Village to be selected over locations in the other states. The Global Distribution Center expands Weber's presence in Huntley, and will ultimately bring an additional 500 jobs to the community.

HIWIN Corporation Inc. is currently completing construction of a 117,441 square-foot office and warehouse facility on a 15.25-acre site in the Huntley Corporate Park along I-90 at Route 47. HIWIN Corporation is a high tech company known for designing precision components such as linear guides, ball screws and robotic equipment. HIWIN is currently located in Elgin, and chose the Huntley location due to its great Tollway access and the ability to acquire enough land for future expansions. HIWIN's parent company is based in Taiwan, with additional corporate presence in 12 countries including France, Germany, Japan, Italy, and Singapore. The Huntley location will be HIWIN's US Headquarters.

Centegra Hospital Huntley is a 128 bed full service hospital which opened in August 2016. The \$230+ million state of the art facility will service the surrounding communities for many years to come. Over \$150 million was spent locally on the 800 construction jobs which were created in the two years it took to build the facility. So far about 400 new jobs have been created and Centegra Health System expects to eventually employ about 1,000 Associates at Centegra Hospital-Huntley.

Centegra has announced a partnership with **Rosalind Franklin University of Medicine and Science** and the **Chicago Medical School** to open a 30,000-square-foot regional campus within Centegra's 80,000 square foot Medical Office Building in Huntley (opening in March 2017).
